

ABOUT

Computer Science graduate with hands-on experience in software quality assurance, manual testing, and ERP development. I bring a practical, detail-oriented approach to test case design, defect tracking, API testing, and building reliable software solutions that align with business and technical requirements.

SKILLS

QA & Testing	Manual Testing, Test Case Design, Functional & Regression Testing, Exploratory Testing, SDLC, Defect Tracking, API Testing, Test Automation (Basics)
Frontend	React.js, JavaScript, HTML, CSS, Mantine UI
ERP	MS Dynamics 365 Business Central, AL Language
Backend	Node.js, Express.js, PHP
Languages	Python, C++, C
Tools	MongoDB, MySQL, SQL, Postman, Selenium, Git

EDUCATION

BSc Computer Science University of Engineering & Technology, Lahore	Dec 2022 – Jun 2026	Matriculation in Biology Aligarh Public School	2015 – 2020
Intermediate in Computer Science Punjab Group of Colleges	Nov 2020 – Apr 2022	Schooling Lahore Grammar School	2007 – 2015

PROFESSIONAL EXPERIENCE

SQA Engineer <i>Corvit Networks</i>	Jul 2026 – Present
- Supported quality assurance by manually testing web and desktop applications, identifying issues, and documenting defects to help deliver reliable software. - Created and executed detailed test cases for functional, regression, and usability scenarios based on business and technical requirements. - Applied core SQA practices such as SDLC/STLC and defect lifecycle management while building a stronger foundation in regression-focused testing and basic automation.	

Business Central Developer <i>Rubiks Technologies · Part-Time</i>	Oct 2025 – Jun 2026
- Performed functional and technical testing of Business Central customizations, prepared professional bug reports, and created detailed test cases and documentation for ERP features. - Contributed to the development and maintenance of AL extensions for Microsoft Dynamics 365 Business Central while designing custom pages, reports, and codeunits to improve process efficiency.	

ERP Development Intern <i>Rubiks Technologies</i>	Jul 2025 – Sep 2025
- Worked on AL customizations for Business Central, including modified reports and user interface pages, while supporting functional validation of ERP features. - Gained hands-on experience with ERP data flows and business logic in a real-world environment.	

Full Stack Development Intern <i>Rubiks Technologies</i>	Jan 2025 – Mar 2025
- Built and helped deploy full-stack features using React.js and Node.js for a production client application. - Developed RESTful API endpoints with Express.js and MongoDB to improve data access and performance for key modules.	

CERTIFICATIONS

- Web Development Fellowship — ACM UET Top 10 of hundreds of applicants
- Microsoft Office Specialist Certificate
- UI/UX Fellowship Certificate
- Frontend Web Development Bootcamp

KEY PROJECTS

AikApply <i>Python · React · MongoDB · AI</i>
- An AI-powered university application portal that simplifies multi-institution workflows through a single input. - Includes an integrated chatbot, recommendation engine, application tracker, and deadline reminders to support a smoother experience.

PO Lookup Dashboard <i>React · Mantine UI</i>
An internal procurement search interface with real-time filtering, modal drill-down views, and validation alerts that made purchase order access more efficient for the client team.

E-Commerce Website <i>PHP · MySQL · HTML · CSS</i>
Full-stack e-commerce platform with product listings, user authentication, shopping cart, and an admin-facing inventory management backend.

YouTube / Twitter Clone <i>Node.js · Express.js · MongoDB · JWT</i>
Scalable backend with RESTful APIs tested in Postman, JWT authentication, and secure password handling.

LEADERSHIP & ACTIVITIES

Public Relations Lead · MLSA UET Led outreach and partnerships for Tech Tehwar 2024 while building strong collaborations across university societies.	Jun 2024 – Feb 2025
Assistant PR Officer · GDSC UET Helped organize cross-society events and was recognized as Best Member of the Month.	Jun 2024 – Sep 2024
Event Management Lead · MLSA UET Led end-to-end planning and logistics for major tech events with a strong focus on coordination and delivery.	Feb 2024 – Jun 2024
